

Item specifics

Application: Crimping

Material: Carbon Steel

Model Number: JCR-16

Crimping Range(Cable end sleeves): 0.25-6mm²/AWG23-10

Size: 175x75x20mm

Type: Slip Joint Pliers

Type: Mini Pliers

Crimping Range(Twin end sleeves): 2x0.25 - 2x4.0/AWG2x20-2x11

Weight: 0.36kg

Product Description

Description

Item No	Range of Application	Capacity(mm ²)	AWG	Size(mm)	weight (Kg)
JCR-16	Cable end-sleeves	6-16	10-5	210x75x20	0.45
	Twin end sleeves	2x0.4-2X6.0	2x11-2x10		

It is applicable for tubular bare terminals and pre-insulated terminal on non-welding connection complied with standard electrical connection. When crimping, the terminal should be put into crimping pliers laterally. The demanded pressing force must be reached before the brake unit automatically release the jaw of the pliers.

Thus high quality crimping standard could be ensured during repeatedly crimping. Due to perfect gripping position fixed and logical and light structure and the handle shape design meeting human being engineering principle, it reduces fatigue degree.
