features

- **Safe and reliable**
- **LPCB certified to BS5839 :part 2 : 1983**
- **Available with or without internal resistor**
- **Flush or surface mounting**
- **IP24D rating**
- **Terminals for up to 2.5mm² conductors**
- **Complimentary range of accessories**

The 2000 series manual call points have been developed to provide a manual alarm interface to conventional fire alarm systems. High quality switching components and materials combine to provide excellent reliability and safety.

The series is available in a variety of options including different colours, mountings and switching arrangements. This flexibility ensures that a call point is available to match the environment and the installation.

Function testing of the call points is easily achieved through the use of a specialist test key (provided) which is simply pushed into the bottom of the unit to activate the switch.

mechanical

Material	Polycarbonate ABS plastic
Flammability	UL94-HB
Ingress protection	IP24D

MORLEY IAS

ETT-P

Terminal tray. Aids installation on flush mounting devices.

KG1X10

Call point glass.
Pack of 10 units

SR3T-PC/ABS

Surface mounting back box for flush mounting units (RED colour)

PS115

Call point covers

PS037-M355X5

Call point cover seals.
Pack of 10 units.

Note

All manual call points are supplied without call point glass. A plastic shield is fitted in its place for protection of the switching element during installation.
