

NH Solid Links

ACCESSORIES FOR FUSES & FUSE SYSTEMS

IEC SOLID LINKS UL NEUTRAL LINKS

NH solid links have a standard design. The current carrying parts are made of silver plated copper. It's also possible to get nickel plated design on request.

The synthetic parts for insulated tags are in accordance with VDE 0636/DIN 57635.

FEATURES & BENEFITS

- provides safe and visible means of isolation in a network
- higher current carrying capacity of equipment due to low power dissipation of the copper solid links
- safe and easy operation when used with NH-fuse handle
- can be used as switch disconnecter in combination with NH-switches and NH-bases
- dimensions equivalent to those of NH-fuse links: sizes 000 to 4/4a
- available in two versions: with live and insulated tags

APPLICATIONS

- NH-solid links can be used for switching and isolating in conjunction with NH-fuse switch disconnectors and NH-fuse bases instead of NH-fuse links.

STANDARDS

- VDE 0636 / DIN 57635
