

TESTBOY 105

Non-contact voltage tester with LED lamp

The non-contact voltage tester Testboy 105 detects voltage-carrying conductors from 12 V AC. Due to optical, acoustic and vibrating indication, it is especially easy and reliable to use. Due to the capacitive measurement procedure, invisible interruptions in the cables can be identified within a few seconds with only a few millimetres tolerance.

How you benefit:

- | capacitive measurement procedure
- | optical, acoustic and vibrating indications
- | measurements from 12 V AC
- | LED flashlight
- | IEC/EN 61010-1 (DIN VDE 0411)

Specifications

Technical Data	TESTBOY 105
Display	optical, acoustic, vibrating
Measurement Range	12–1000 V AC
Power Supply	2 × 1.5 V AAA Micro
Overload Category	CAT III 1000 V
Integrated LED-torch Lamp	yes
Standard	IEC/EN 61010-1 (DIN VDE 0411)
Housing	ABS synthetic material, resistant to breaking by impact
Dimension	160 x 25 mm
Weight	45 g
Scope of Delivery	incl. batteries
