

## SCREENED SEPARABLE CONNECTION SYSTEM

### RSTI-58 FOR 630/1250 A UP TO 24 kV

#### KEY FEATURES

- The insulation made highly modified silicone rubber
- Thin-walled screen protects the connection system
- Easily accessible rear plug with capacitive test point
- Few accessories required for system test
- Complete kit including lugs facilitates installation and storage

TE Connectivity's (TE) Raychem screened separable connectors RSTI-58 are designed to connect single- and three-core polymeric cables to medium-voltage gas insulated switchgear and other equipment using bushings type "C" (EN50180/EN50181) specified for 630/1250 A up to 24 kV.

Made of a highly modified silicone rubber and protected by a thin-walled outer conductive screen connected to earth, Raychem connectors RSTI-58 are equally suited for indoor and outdoor installation. Supporting a wide application range, the design incorporates one body and stress cone adapters to cover all cross-sections from 25 to 300 mm<sup>2</sup>. The overall cut-back dimensions are designed to take up minimum space in the terminal box.

TE's Raychem connectors RSTI-58 are equipped with a capacitive test point for determining whether the circuit is energised. This test point is protected by a conductive cap. After cable preparation and lubrication, the stress control adapter is simply slid into place, followed by the screened connector body. These two components can be installed under virtually any conditions. A separable mounting system ensures easy installation of the connector onto the bushing.

All kits include high-performance multi-range mechanical or DIN compression lugs matching the design of the connector RSTI-58.

**Customers can count on consistent, high quality products, driven by TE's proven innovation and backed by our extraordinary customer support.**

## Screened Separable Connection System

The screened cable connector RSTI-58 meets CENELEC HD 629.1 S2 requirements, which includes BS, VDE and other international specifications

### TECHNICAL DATA

Cable insulation diameter range	12.7 - 34.6 mm
Connector cross-section range	25 - 300 mm <sup>2</sup>
Maximum system voltage	24 kV
Continuous current rating	800 A
Basic impulse level	150 kV
Partial discharge at 2 U <sub>0</sub>	< 2 pC
AC voltage withstand, 1 min	57 kV
DC voltage withstand, 15 min	76 kV
Thermal short circuit, 1 s	54 kA
Dynamic short circuit	125 kA
